Notes: The grid represents a subjective analysis of the policy areas (column 3 - "Policy Summary") included by AUPs studied. Where an AUP includes a statement which a is fully aligned it is given a score of 3 (green), scaling down to zero, indicating no alignment. Percentage summaries are provided by policy area (row) and AUP (column) to indicate the degree of alignment between the values, where a value of 100% would indicate a score of 3 for all values, with a brighter red indicating a weaker agreement.
