Agenda: Network (Automation) eAcademy

- Introduction: Orchestration, Automation and Virtualisation in GN4-3
- Architecture/Mapping
- Training
- Terminology
- Maturity Model
- Wiki and dissemination
- What next?

OAV: Orchestration, Automation and Virtualisation

Why Architecture, Training, Terminology, Maturity Model...?

- OAV Survey to the NRENs (published in Sep 19):

https://www.geant.org/Projects/GEANT_Project_GN4-3/GN43_deliverables/D6-2_Automation-and-Orchestration-of-Services-in-the-GEANT-Community.pdf

- Several discussions and workshops around the topic:

- [GN4-3 Future Service Strategy Workshop, May 19](#)
- [BoF session at TNC, June 19](#)
- [STF17, July 2019](#)
- [Network Management and Monitoring Workshop \(NEMMO\), Oct 19](#)

Collaborative approach to OAV in the GÉANT Community

Strong need for collaboration and exchange of knowledge and expertise

Knowledge as a gap

We speak different languages

A generally accepted architecture blueprint needed

NRENs are willing to share experiences and learn from others

Network Automation eAcademy

Powered by:

Architecture & Mappings

- Mapping NREN & use cases architectures to a common blueprint, the TM Forum Open Digital Architecture (functional architecture).

NREN use cases

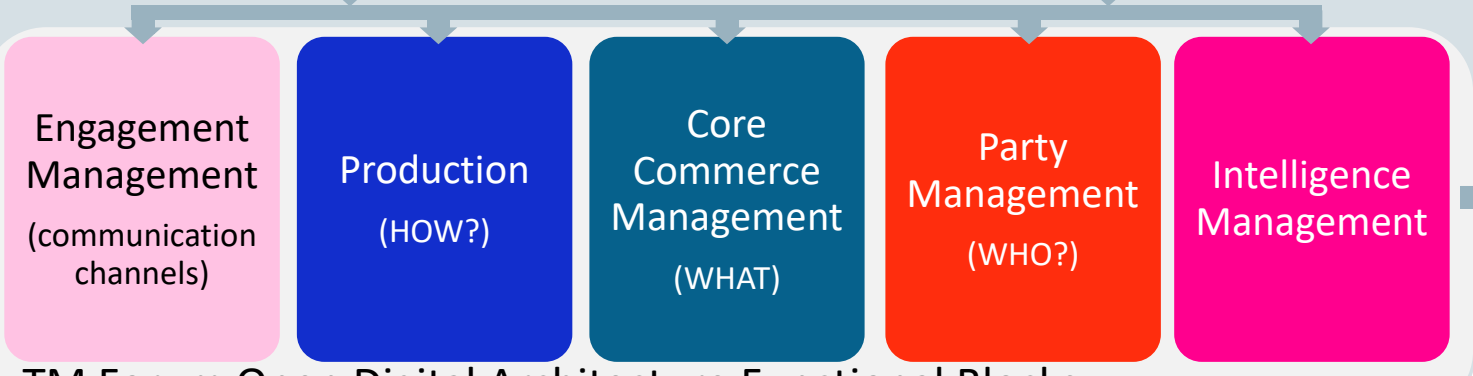

- CARNET
- CYNET
- GRNET
- HEAnet
- PIONIER
- SURFNET

other use cases

Ansible

Ansible

Welcome to the Course: Ansible

COURSE DATE: On Demand	DURATION: 60 minutes	COMMITMENT: 60 minutes + lab time
REQUIREMENT: YAML Learning Module	COURSE TYPE: Self-paced	CREDENTIAL: Certificate

Learning path:	OAV Training Portal
Prerequisite:	Formats: YAML
Preceded by:	Introduction to Automation
Followed by:	Puppet (not yet published)
Next available:	Configuration Management

Course summary

Ansible is an automation framework which allows users to manage services, the servers on which they run and the network devices which interconnect them. This course has several sections which should be taken in order;

Ansible Requirement: YAML, YAML Requirement?

Formats: YAML

Home > My courses > Technical skills > Network > Network Automation eAcademy > Formats: YAML

OVERVIEW Main Goals Formats: YAML Useful Links Quiz Feedback & Certicate

Welcome to the Course: Formats: YAML

From September 2021

20 min

30 min

Introduction to Data Models, Data
Formats, and Protocols (recommended)

Selfpaced

Certificate of completion

Learning path:	OAV Training Portal
Preceded by:	Formats: XML
Followed by:	Formats: JSON

Course summary

YAML is a human-friendly data serialisation standard broadly used in Orchestration, Automation and Virtualisation (OAV). This course offers a quick overview of the YAML syntax and some examples from the real world in a single video, with useful tips and references and a quiz.

15 For more detail, the learning unit discusses the following topics:

<https://e-academy.geant.org/moodle/course/view.php?id=129>

www.geant.org

Ansible ← YAML ← Data models, Data Formats, and Protocols

The screenshot shows the GÉANT eAcademy interface. At the top, there's a navigation bar with 'GÉANT eAcademy' and icons for home, search, and user profile. Below this is a breadcrumb trail: Home > My courses > Technical skills > Network > Network Automation eAcademy > Introduction to data modelling, data formats and protocols. The main content area has a tabbed interface with 'OVERVIEW' selected. The overview section includes a course title, a welcome message, and six key metrics: Course Date (From January 2021), Duration (20 minutes), Commitment (30 minutes), Requirement (None), Course Type (Self-paced), and Credential (Certificate of Completion). At the bottom, there's a table with learning path, preceded by, and followed by information.

Ansible: Video with Subtitles

GÉANT eAcademy

Ansible

Home > My courses > Technical skills > Network > Network Automation eAcademy > Ansible > II - Playbooks, Variables and Modules

OVERVIEW I - Settings, Inventory, Module Basics II - Playbooks, Variables and Modules III - How people use Ansible, Loops, Jinja2 IV - Playbook Validation, Vault, Roles, Sharing content Test environments and Useful Links Fee

Please watch the video below to continue your Ansible learning journey.

At the end of this section you will be able to

- Run playbooks and parse their outputs
- Use ssh troubleshooting to identify problems which Ansible may hide from you
- Understand Ansible's use of variables and how to reference their value
- Understand Ansible's `host_vars/group_vars` directory structure
- Understand what modules do and how to use them in playbooks

```

---
- name: Install mod_rewrite on all webservers
  hosts: webservers
  become: true
  tasks:
    - name: Install Apache
      apt: pkg=apache2 state=latest

    - name: enable mod_rewrite
      apache2_module: name=rewrite state=present
      notify:
        - restart_apache2

  handlers:
    - name: restart_apache2
      service: name=apache2 state=restarted
  
```

OVERVIEW I - Settings, Inventory, Module Basics II - Playbooks, ...

Please watch the video below to continue your Ansible learning journey.

At the end of this section you will be able to

- Run playbooks and parse their outputs
- Use ssh troubleshooting to identify problems which Ansible may face
- Understand Ansible's use of variables and how to reference their values
- Understand Ansible's host_vars/group_vars directory structure
- Understand what modules do and how to use them in playbooks

[Ansible section II - slides and speaker notes PDF document](#)

Playbooks

```

---
# Oh look, a comment...
# ...spread out over multiple lines

- name: Set up Apache           # Or nginx, or Mongoose
  hosts: webservers
  tasks:
    - name: install Apache
    - name: generate Apache config file
    - name: download web content to relevant directory
    - name: restart Apache
    - name: eat cake
    
```

5 www.geant.org GÉANT

Most ansible users gather their Ansible work in YAML files called **Playbooks** – which start with three dashes. Playbook **comments** start with hashes, and are one per line. Playbooks contain a list of plays, or groups of tasks. In a playbook, look for the dashes in column one to see the list of plays. In the example shown here, there is one play (**Set up Apache**).

Playbooks can also contain the hosts or groups which the tasks should influence; these

Practical Examples

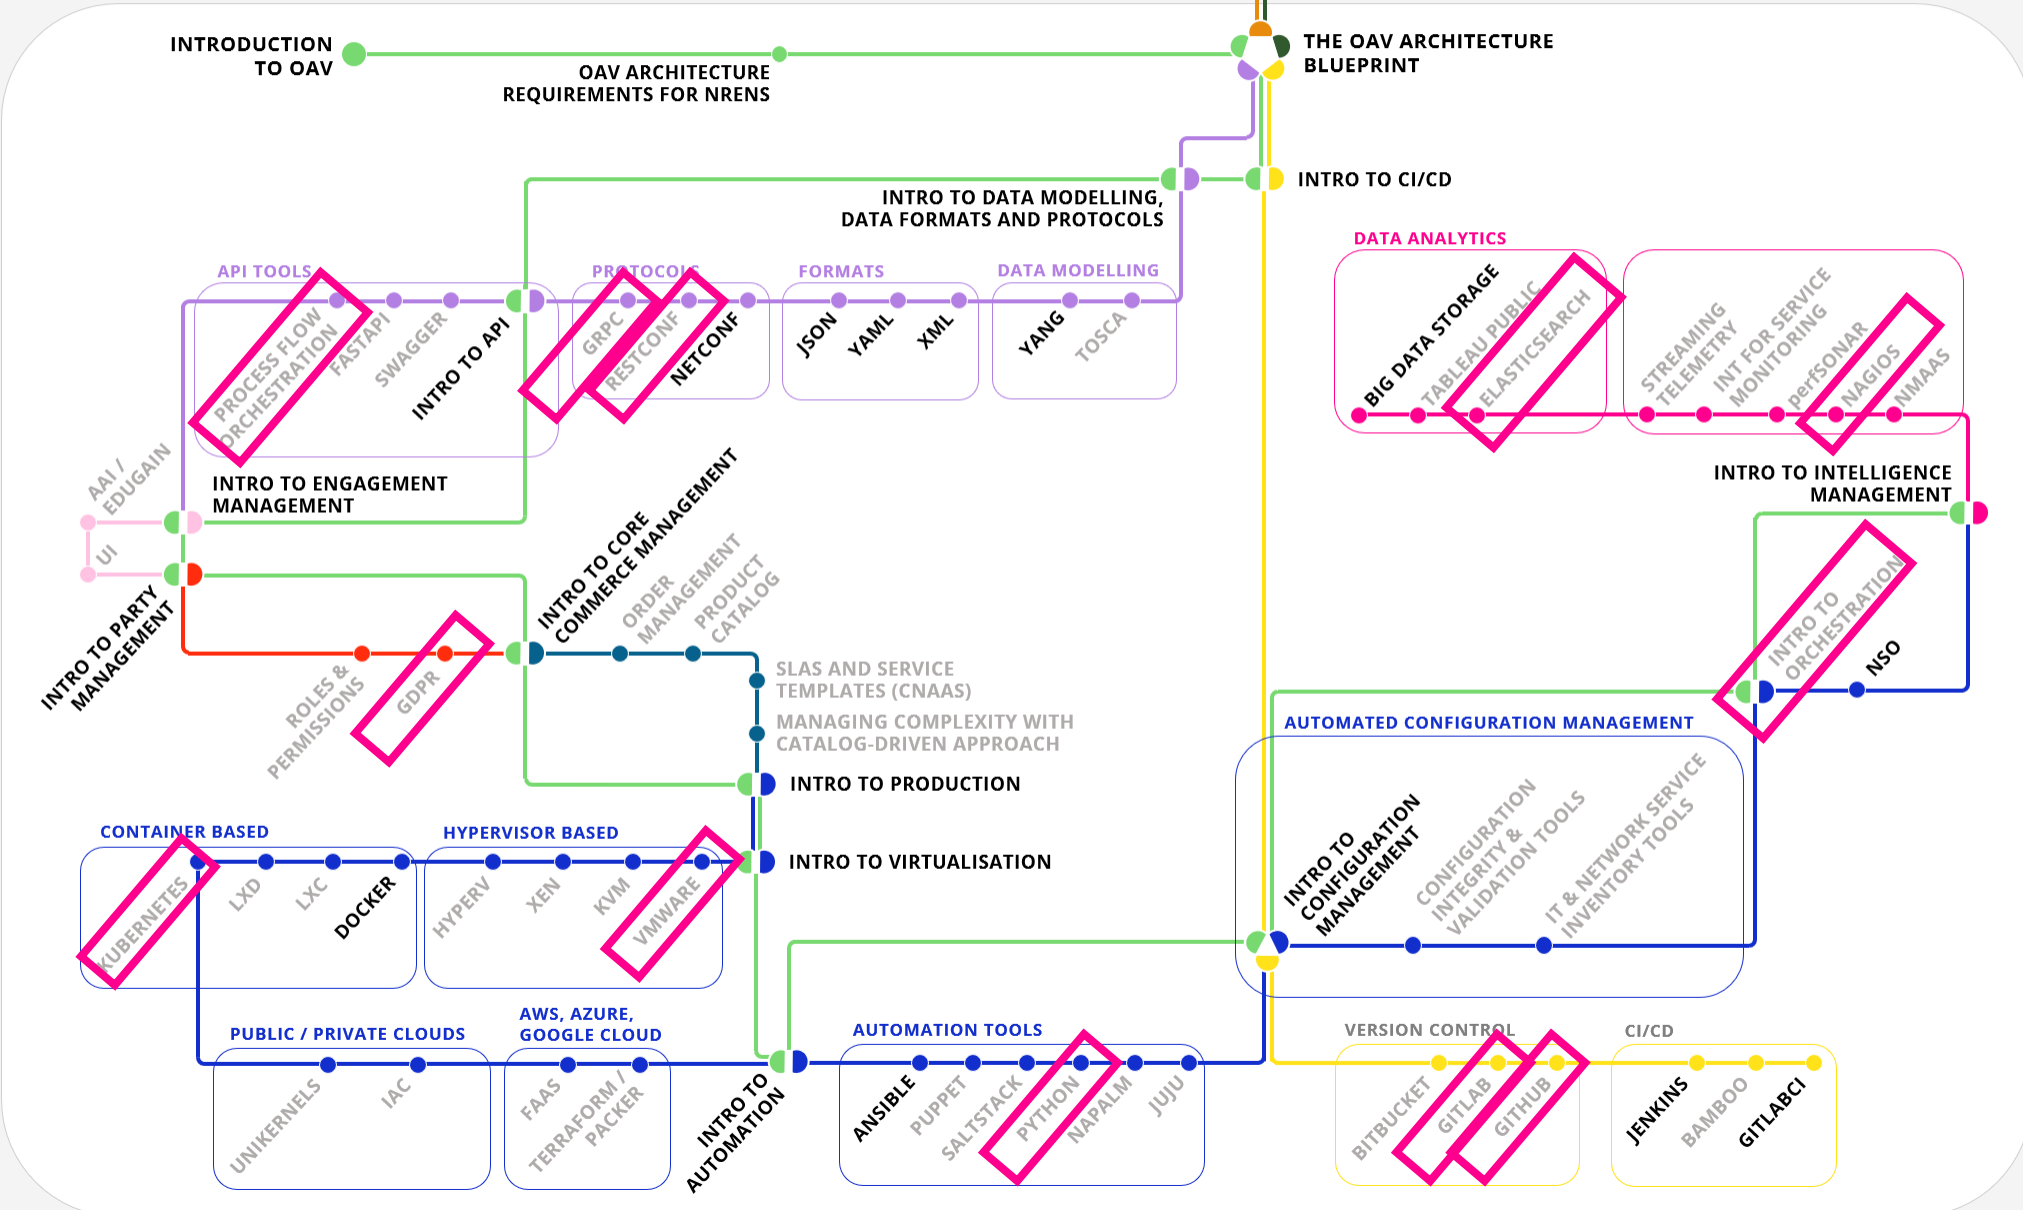

- Ansible:
 - Git repository with the examples in the unit.
 - Mini-Lab: Vagrant testing environment with a Unix server and a JunOS box.
- NETCONF:
 - Installation guide with a virtual environment in GNS3.
 - Adding a static route to a router, step-by-step.
- NSO:
 - Installation of free trial version.
 - Implementing a Radius server configuration over multiple devices.
 - Deploying an ACL on multiple devices, and/or interfaces on a device.

Terminology and Glossary of OAV Terms

- Published version 1.1
- Accepted by the GNA-G Automation Working Group
- New version to follow soon with additional terms about **AI** and **Maturity Model**

OAV Common Terms

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Glossary

OAV Terms	Definition and reference
Architecture component	<p><i>An architecture component is a nontrivial, nearly independent, and replaceable part of a system that is well-defined architecture.</i></p> <ul style="list-style-type: none"> • TM Forum Reference, TMF071 ODA Terminology, TMF071, Release 19.0.1, October 2019
Architecture principles	<p><i>Architecture principles define the underlying general rules and guidelines for the use and deployment of an organisation. They reflect a level of consensus among the various elements of the enterprise, and for the decisions.</i></p> <ul style="list-style-type: none"> • based on https://pubs.opengroup.org/architecture/togaf8-doc/arch/chap29.html

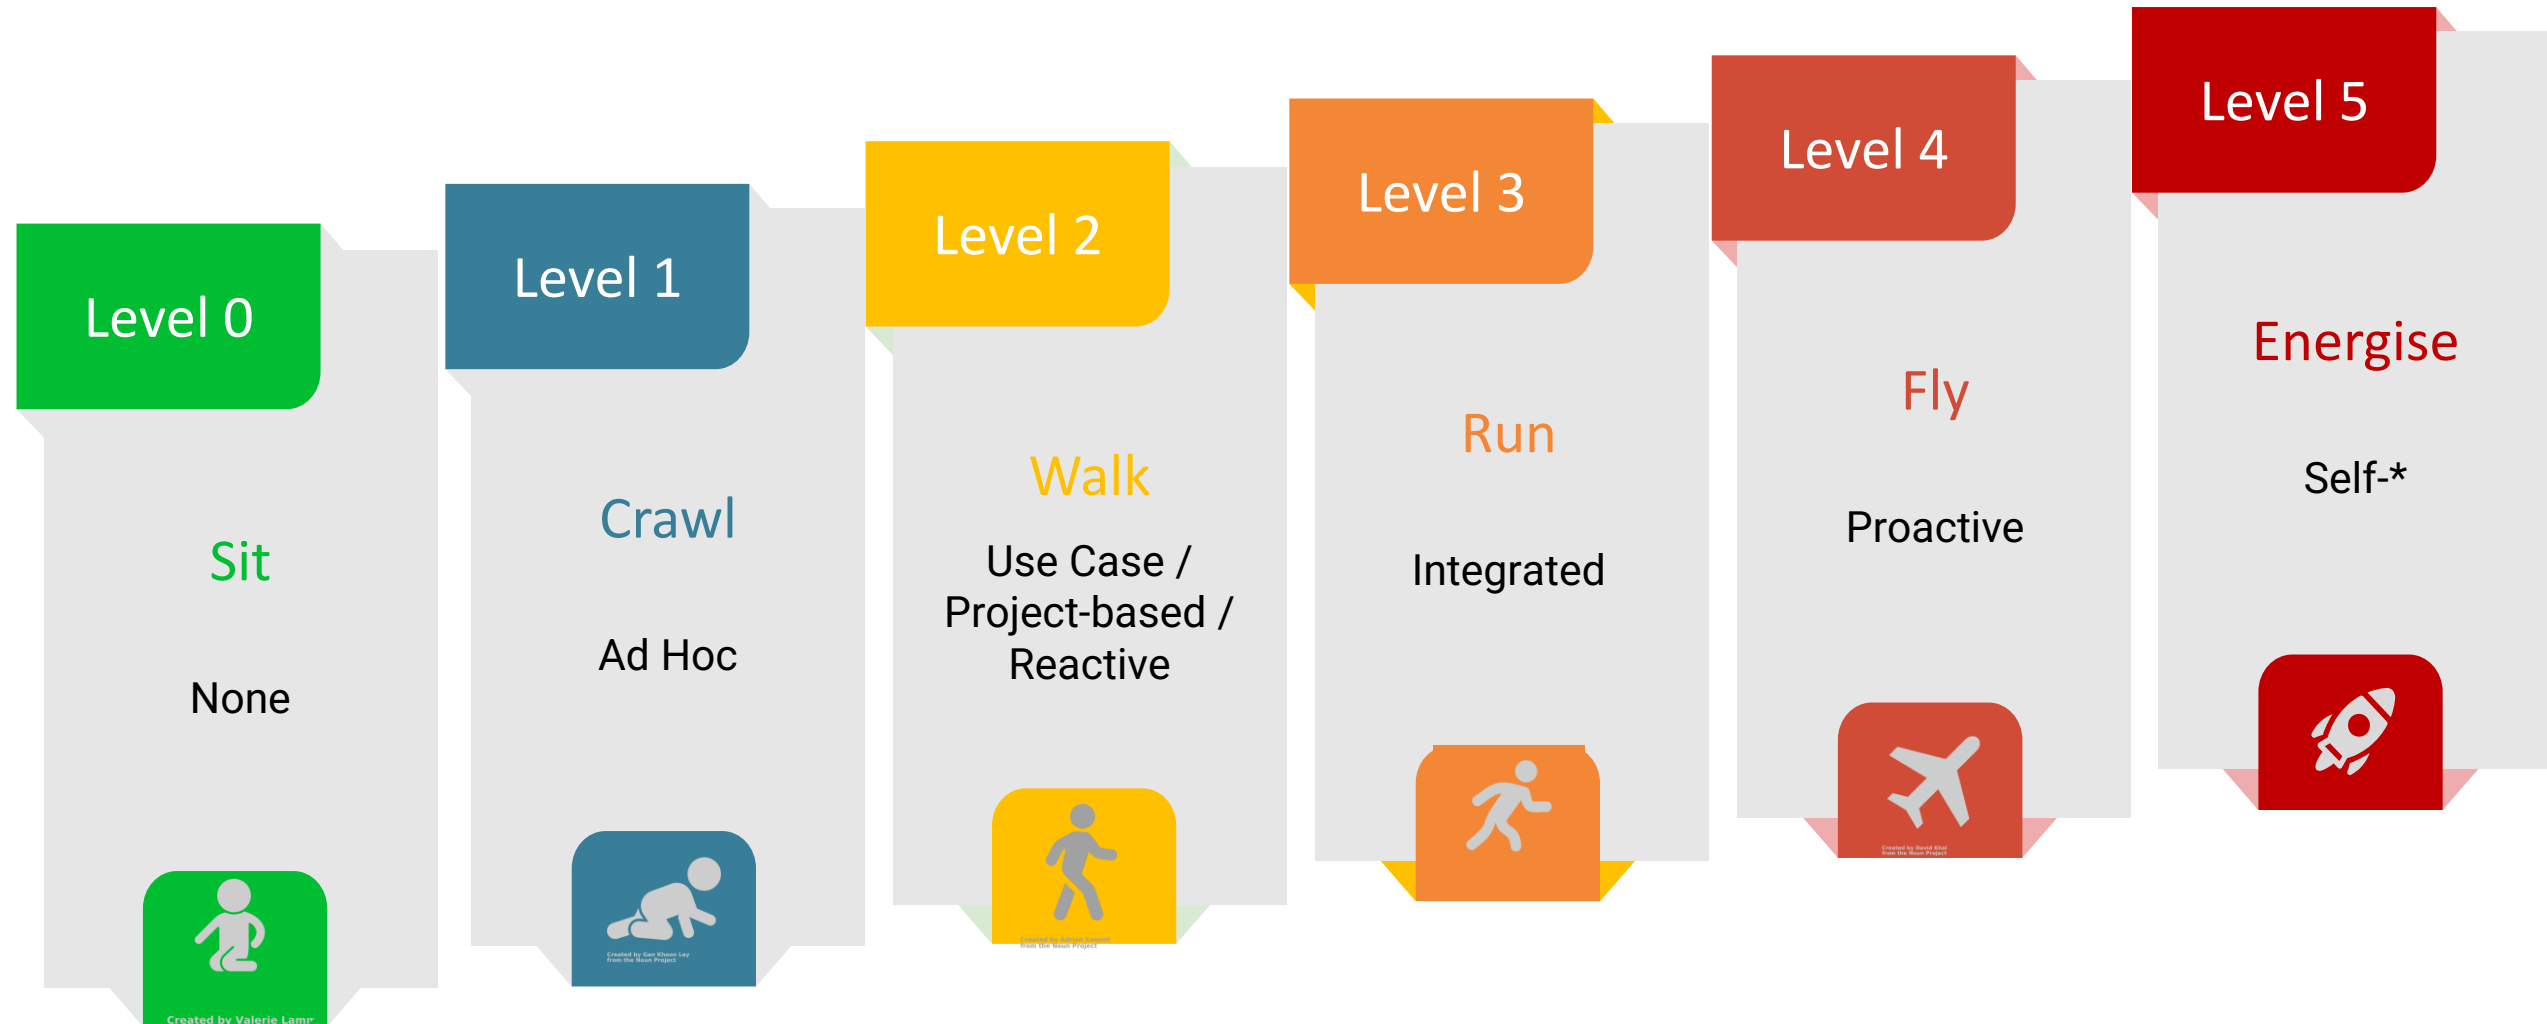

OAV Maturity Model

Measure	Measure the current OAV capabilities in a meaningful way
Identify	Enable clear identification of strengths and improvement points, be aware of threats and opportunities
Prioritise	Help prioritise what to do in order to advance and improve
Journey	Identify gaps between the current and future state and how to get there
