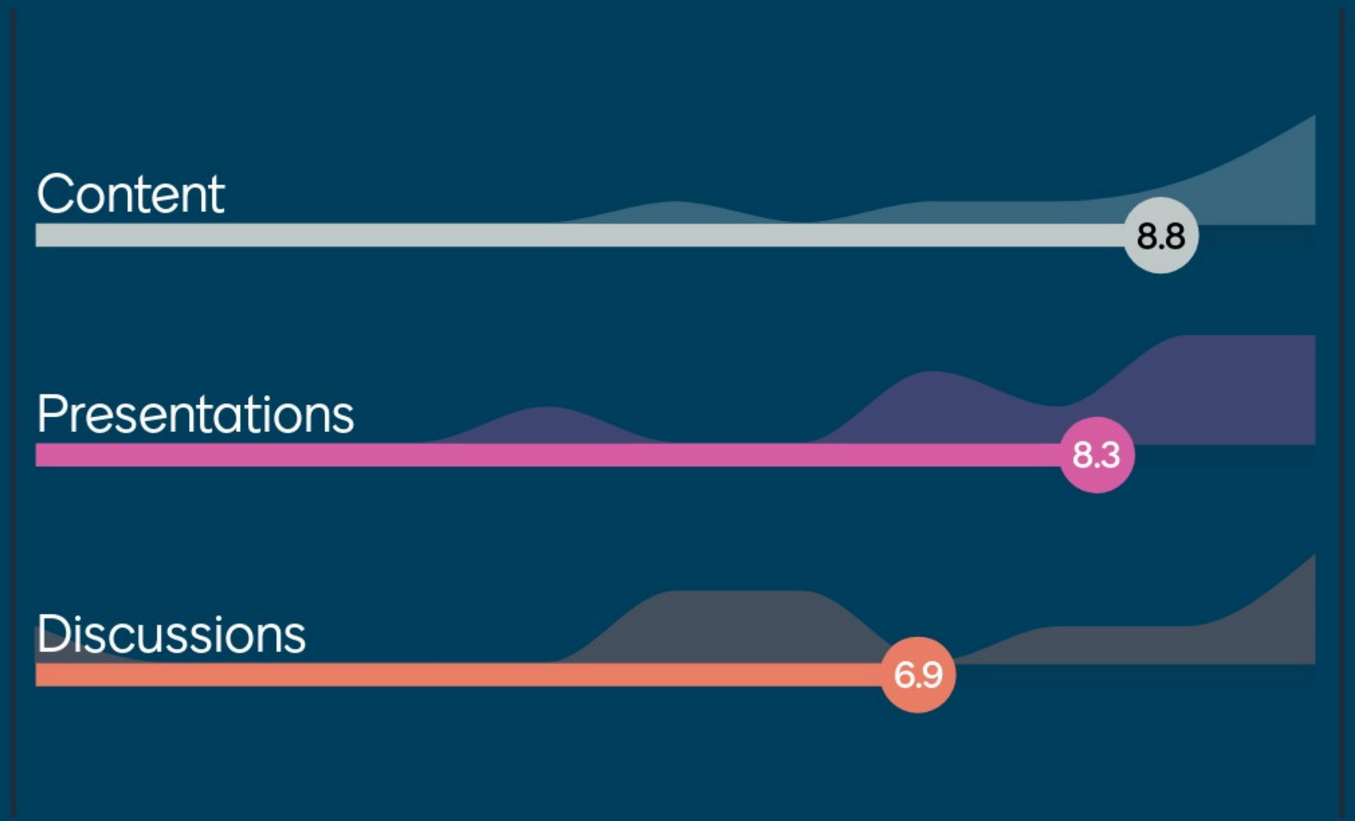
Immersive visual experiences for research and education

24 May 2022

How would you rate this SIG-Multimedia meeting?



What is your take-home message or most useful piece of information from this meeting for your everyday work?

New technologies and ideas to implement in the future

-

A lot of possibilities, but a long way to implement it

Collaborative VR/AR applications are gaining traction for real world applications

loved to see the use cases on sound and 3D mapping

next integrations and potential collaboration for our communities

VR/AR are the future

We need to start workig with new technologies as soon as possible.

Azure Media Service Analytics?

Any future topics you want to discuss?

performing arts

+1 network performing arts

Online meeting solutions for the future

AR/VR production in detail

online video platform solutions

Do you have other comments or suggestions?

video conferences integrations
