WISE SCIV2-WG

https://wise-community.org/

Kick-off meeting

Wednesday 4th May 2016

David Kelsey (STFC-RAL)

Agenda

- Mandate of the working group
- Additional work topics
- Next steps and timetable
- Meeting logistics
  - Video system?
  - Times of meetings
- Next meeting

Background

- SCI (Security for Collaboration among Infrastructures)
  - collaborative activity of information security officers from several large-scale infrastructures
  - including EGI, PRACE, EUDAT, WLCG, XSEDE and HBP
  - A version 1 document has been published
    - "A Trust Framework for Security Collaboration among Infrastructures"
  - *http://pos.sissa.it/archive/conferences/179/011/ISGC%202013_011.pdf*

Background (2)

- SCI defined best practices, trust and policy standards for collaboration
  - with the aim of managing cross-infrastructure operational security risks
- Aim was to establish a common understanding of the security measures each infrastructure has implemented
  - start work on guidelines for interoperation such as the exchange of information during security incident handling

Work-plan

- Work towards a Version 2 document
- Involve wider range of stakeholders
  - NRENS, Identity federations, …
- Address conflicts in version 1 for new stakeholders
- Add new topics/areas, e.g. Clouds
- May give recommendations on assessment of stakeholders against the SCI requirements

New additions

- How to share information on software security vulnerabilities
  - In a trustworthy and safe way
  - Between infrastructures and other stakeholders
  - Share published advisories
    - Some of which are not public
  - Share intelligence on yet-to-be published vulnerabilities?

- Coordinate/synchronise with EU H2020 AARC work?
  - to specify the requirements for a policy/trust framework for Research Communities linked to the national/global R&E identity federations via a bridge commonly known as an IdP/SP proxy
  - Do we have to have two forks? Or can we synchronise somehow?

Next steps and timeline

I propose starting with two topics

- 1) Discuss how best to share Vulnerability Advisories
    - Public notices
    - Non-public notices?

- 2) Look at topics in SCI Version 1
    - Which topics need to be added?
    - Any topics for removal?
    - Other conflicts, e.g. with NRENS?

- Time to complete both
    - By end of May 2016?

Meeting logistics

- Timeslot for meeting?

- How frequently to meet?

- Video conference system to use?

Next meeting

- Proposal
- Friday 13th May 2016
  - One hour video
  - Starting at 13:00 UTC (15:00 CEST, 14:00 BST)
- OK?
- Agenda
  - First look at each of our first two topics
    - Topic 1 – we can discuss by email
    - Topic 2 – Homework for members of the group
