

# Up to University-Up2U!

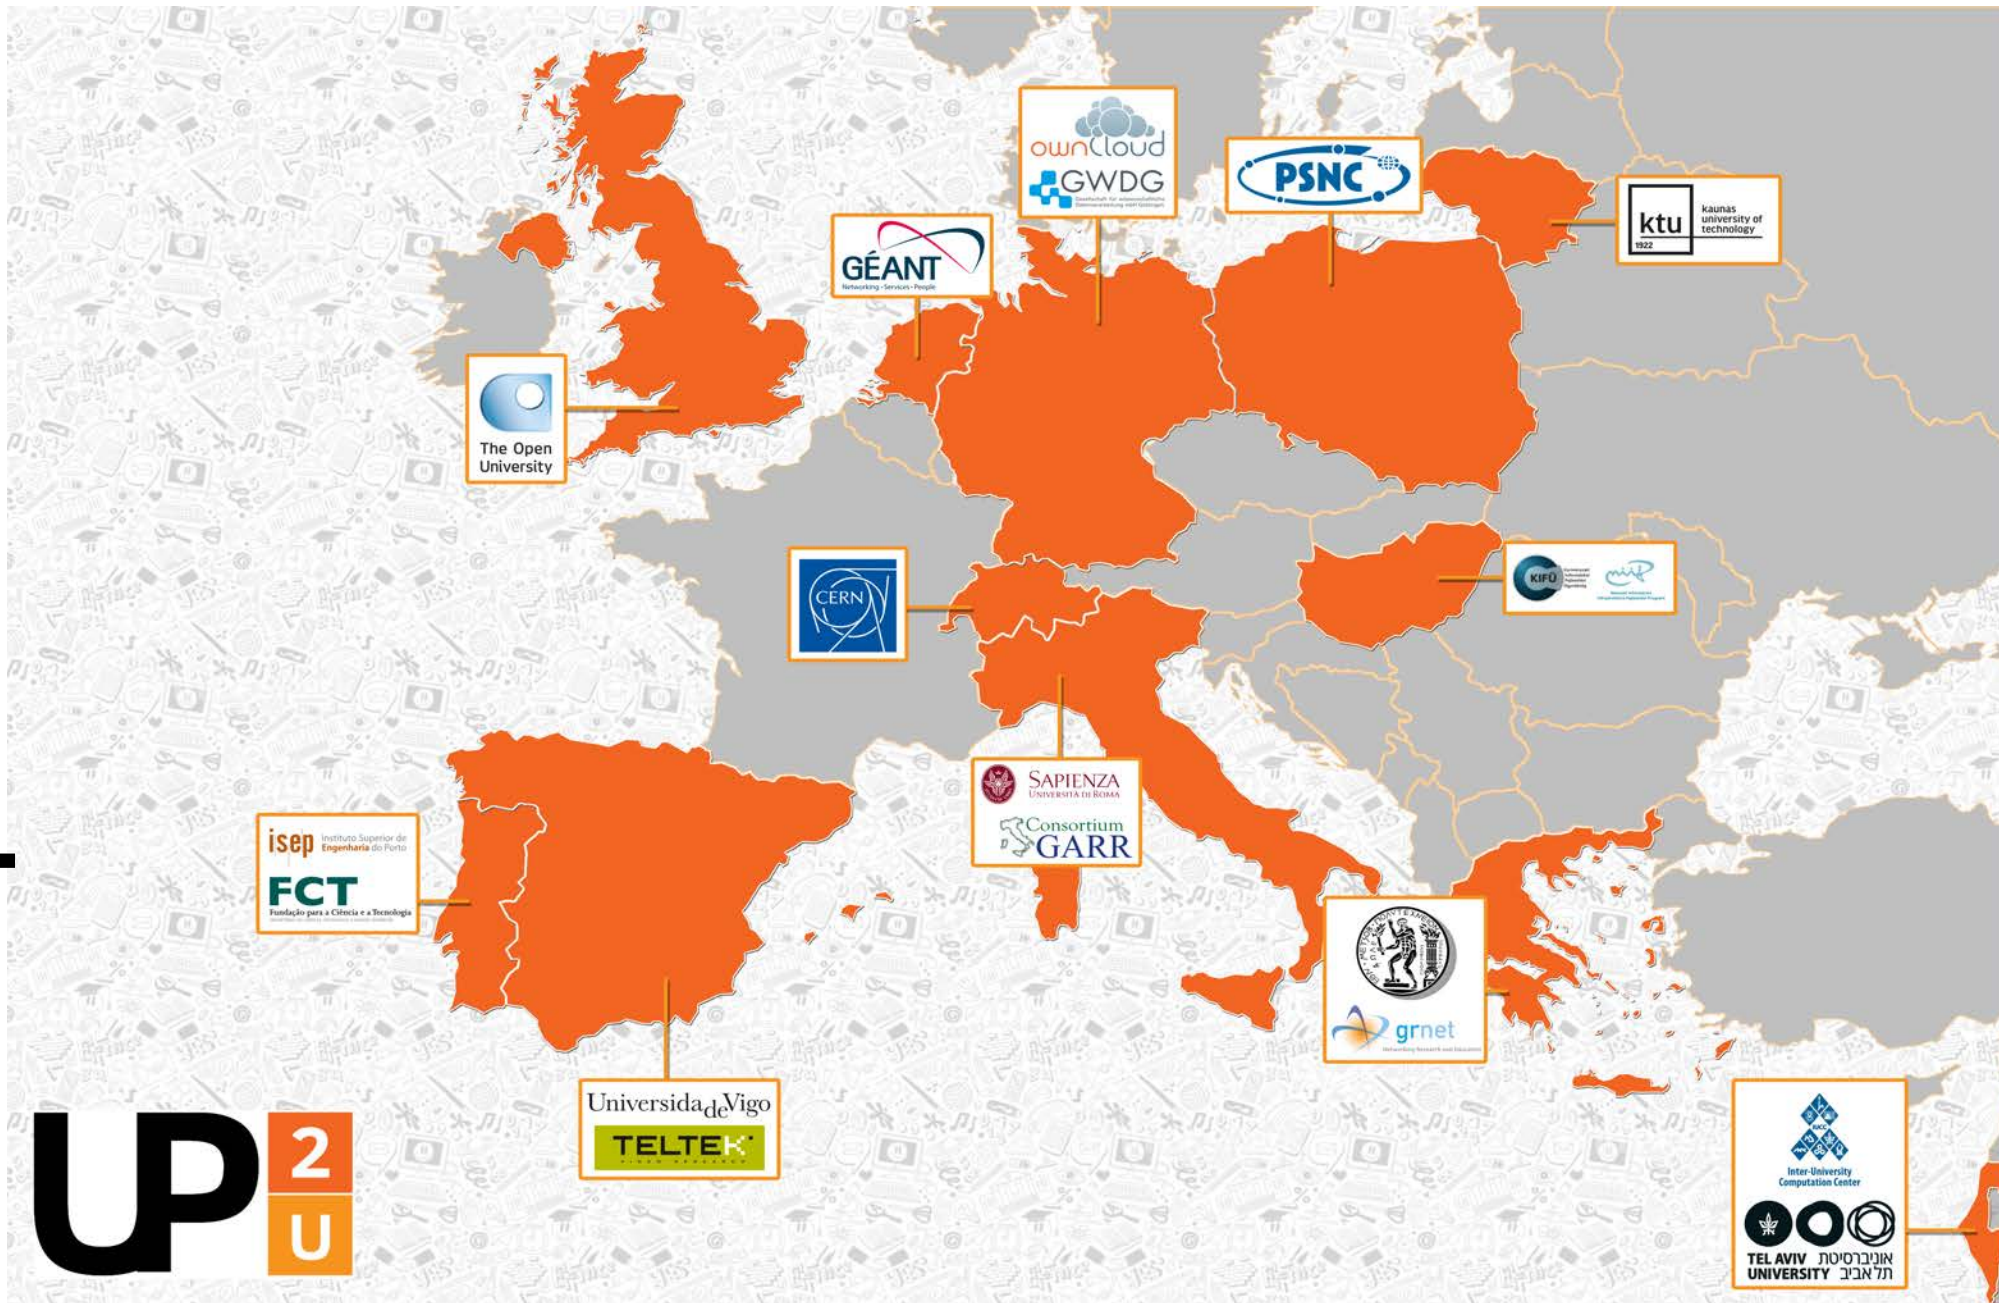

*Barbara Tóth*  
KIFÜ, Hungary

GÉANT Special Interest Group meeting  
13-15 March 2018  
Espoo, Finland

# Introduction to the project

- ◆ Up2U is a **36 month** collaborative project with **5M Euro** funding that kicked off in **January 2017**.
- ◆ Key objective: bridge the gap between secondary schools and higher education & research by enhancing the students' digital skills.
- ◆ The project is coordinated by GÉANT and gathers **18 partners** from **12 countries** across Europe including NRENs, traditional and open universities, infrastructure providers and two commercial partners.

# Up2U PARTNERS

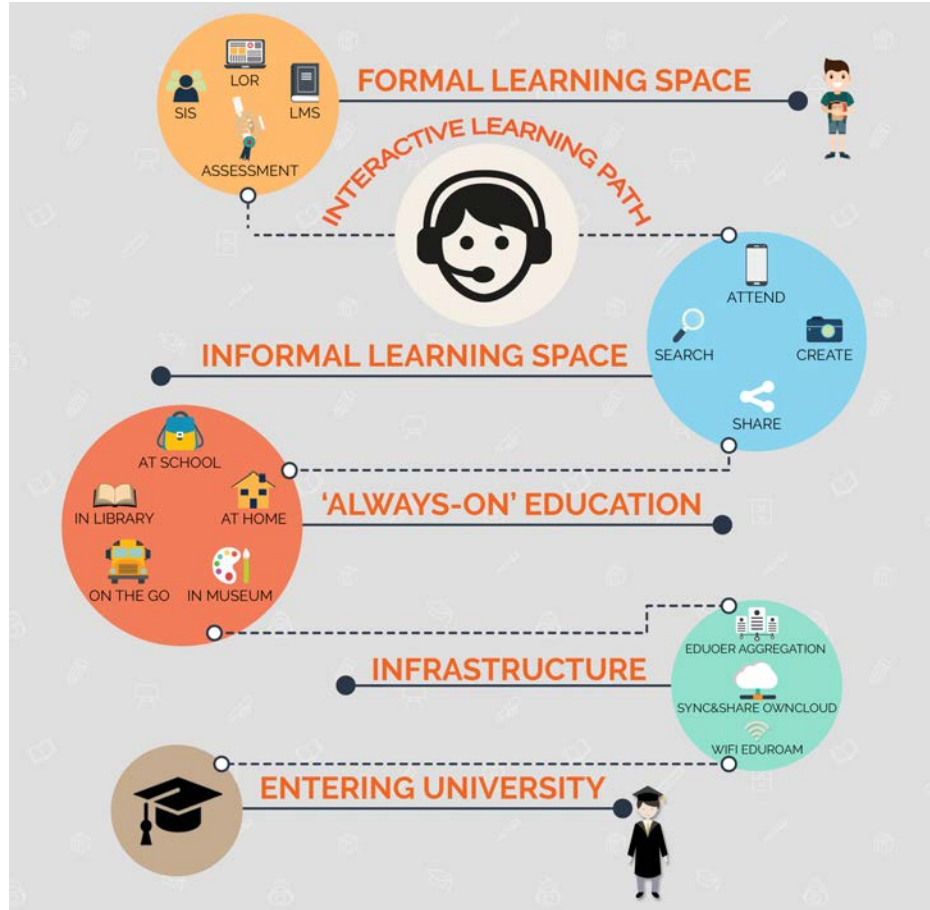

# Up2Universe ecosystem

- ◆ Our goal is to create a **universe of tools and services** that help high school teachers, and students to improve their teaching and learning practices.
- ◆ These technological tools allow greater ease of communication **inside and outside of the classroom**, improving interactions and providing new ways to access knowledge in the **digital age**.

# Supported pedagogy methods

- ◆ Project-based learning embedded in design.
- ◆ Informal learning scenarios.
- ◆ Hybrid learning environment.
- ◆ Virtual classroom.
- ◆ Support personalized learning paths.
- ◆ Peer-to-peer learning scenarios.

# Next Generation Digital Learning Environment 2/1.

- ◆ Our architecture is modular, scalable and portable.
- ◆ We use open technology and standard protocols wherever we can.
- ◆ Our ecosystem is compliant with the latest GDPR regulations by design.
- ◆ Our platform is Moodle based, since this is the nr.1 platform that teachers use.

# Next Generation Digital Learning Environment 2/2.

- ◆ WebSSO (eduGAIN, social media accounts).
- ◆ Group management (powered by eduTEAMS Hub).
- ◆ OER content hub (via eduOER).
- ◆ File Sync&Share storage platform (powered by CERNBox and ownCloud).
- ◆ LTI tools integration and other third-party apps (aka. Up2Universe).
- ◆ Learning Analytics and Open Badges.
- ◆ Mobile application.
- ◆ Multi-language support.

# Available tools at the moment

<b>CERNbox</b>	Cloud-based storage and synchronization solution and sharing for science.
<b>DSpace</b>	An open source digital archives system focused on long-term storage.
<b>eduOER</b>	An Open Educational Resource metadata aggregation hub and portal service.
<b>H5P</b>	H5P makes it easy to create, share and reuse HTML5 content and applications.
<b>Jupyter/SWAN</b>	A platform to produce rich notebooks using a simple web interface.
<b>Knockplop</b>	Open Source multi participant p2p web service based on WebRTC technology.
<b>Personal recorder</b>	A recording and publishing tool.
<b>SelCont</b>	Synchronized e-Learning Content is a toolkit with minimal post-processing effort and no special installation requirements from lecture rooms.

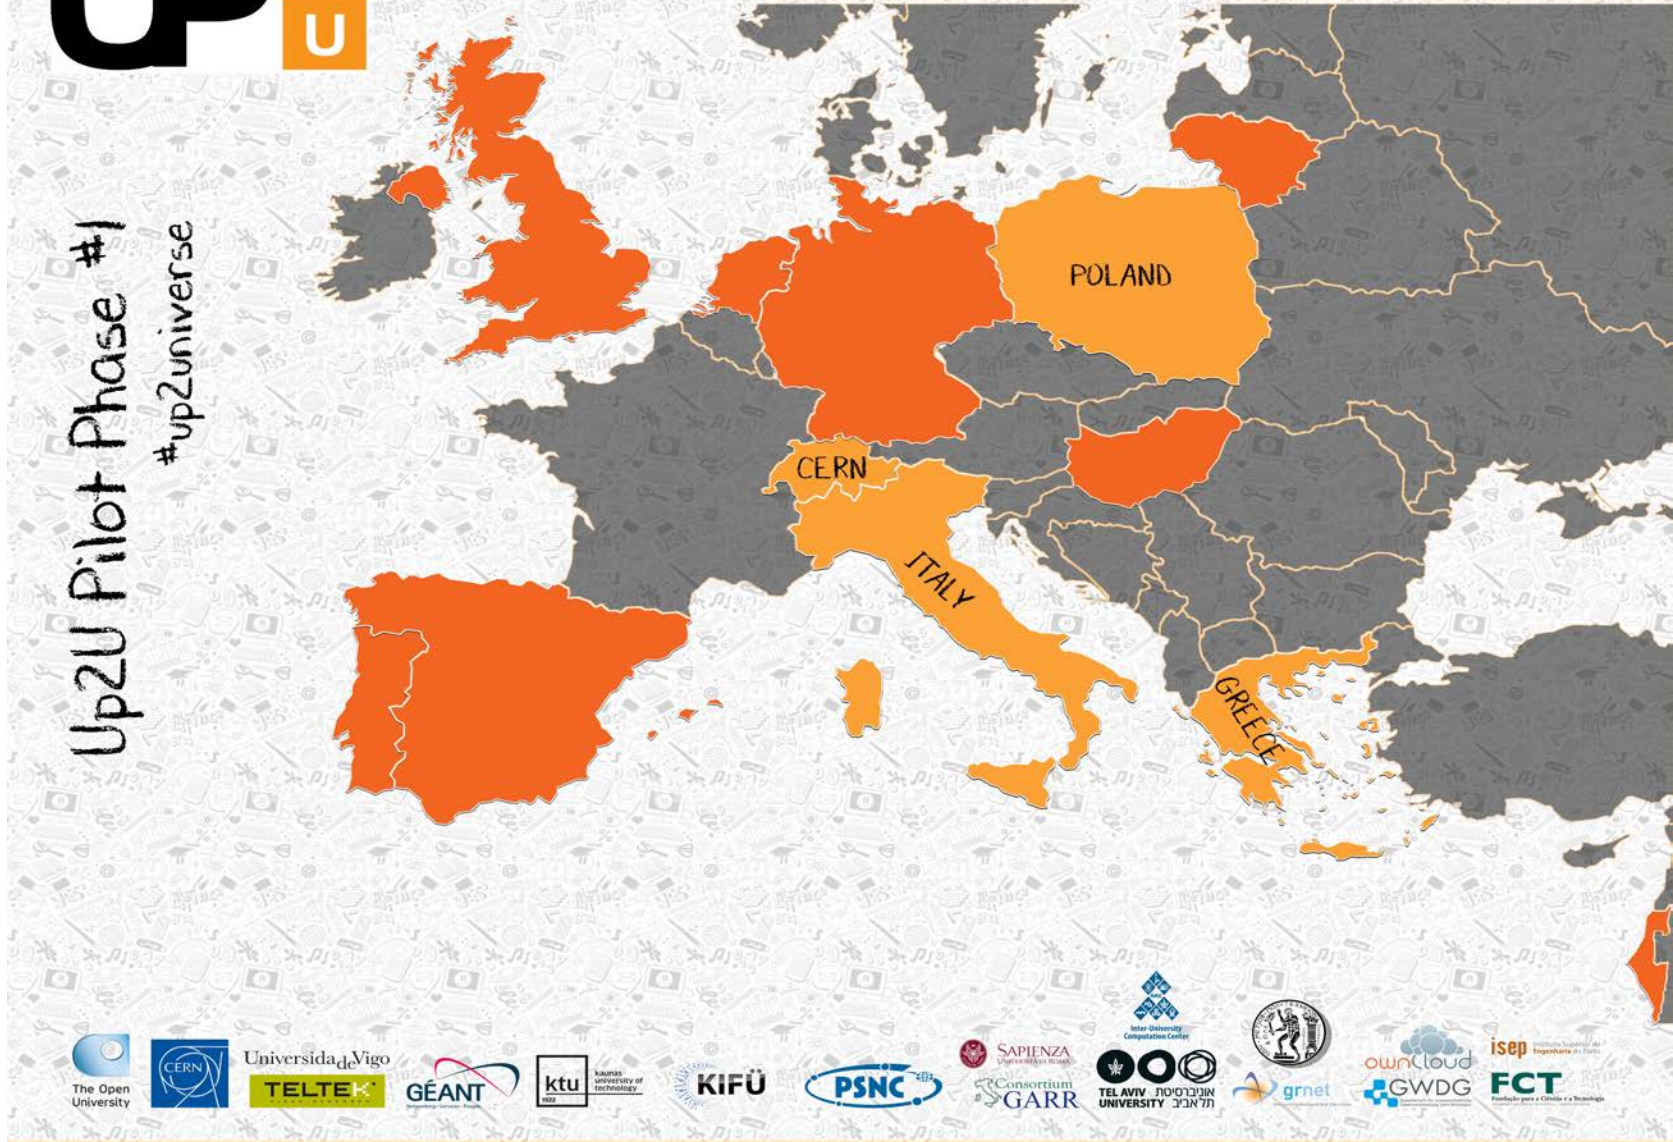

# Pilot activity

# Up2U pilot activity

- ◆ We plan to introduce NGDLE via pilots in the member countries.
- ◆ The first phase of the pilot begins this Spring, the second phase will start in Autumn, 2018.
- ◆ First, we need to train the teachers. Our training team identified the major focus points for training via a survey that focused on the skills the students should acquire.
- ◆ We created an SMC (Subject Matter Committee) that oversees the training material and training plan. The SMC has permanent members and national sub-committees also.

Up2U Pilot Phase #1  
#up2universe

The innovation action leading to these results has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No. 732049 – Up2U

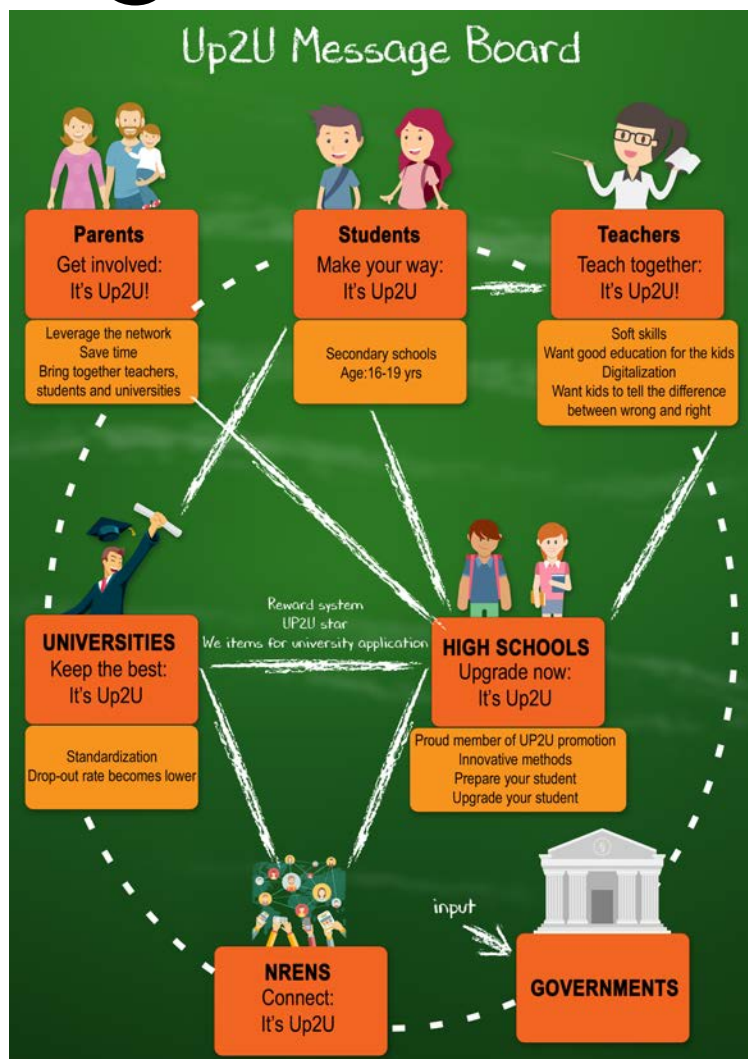

European Commission

Horizon 2020  
European Union Funding  
for Research & Innovation

# Spreading the word about Up2U

# Target audience

- ◆ Our main target audiences are the high school teachers and the high school kids (age 16-19).
- ◆ We also have to think about all the stakeholders involved.
- ◆ Also important: cooperation with similar projects, like [SELFIE](#).

# The Up2U micro-experiment at CERN

- ◆ CERN hosted a 16 year old student, Maja from the UK as a work experience placement.
- ◆ She visited some of the experiment sites and to run hands-on experiments. She collected scientific data, analysed them, provided descriptions, plots, and notes.
- ◆ She created a „reportage” of her experiences at CERN in the form of Jupyter Notebooks that was shared with her classmates and teachers.
- ◆ She posted a [Twitter moments](#) feed about her days at CERN.

A light gray map of Europe is shown in the background. The countries of the United Kingdom, Ireland, France, Germany, Poland, Czech Republic, Slovakia, Austria, Hungary, Italy, Spain, Portugal, Greece, and Turkey are highlighted in a light orange color.

**THANK YOU FOR YOUR  
ATTENTION!**
