

# B003M - You do not have direct access to a meeting room as a participant

## Category

Managing

## Description

If you setup a meeting room and add participant to the meeting, you will need to set the role of the participants to presenters, for the participant to get direct access to the meeting room (access via login).

Expected behavior: If you add participants to a meeting room they will all get direct access to the meeting room as participants, if their status is set to participant (access via login).
